ASSIGNMENT 1

Q1) Write a Scala program to print "Hello, world" and version of the Scala language.

The screenshot shows a Scala IDE window titled 'HelloWorld.scala' with a file icon '3zkj8ft37' and a 'NEW' button. The code editor contains the following Scala code:

```
1 object HelloWorld {  
2   def main(args: Array[String]): Unit = {  
3     println("Hello, world!")  
4     println("Scala language: "+util.Properties.versionString)  
5   }  
6 }  
7
```

On the right side, there is a 'STDIN' section with the text 'Input for the program (Optional)'. Below it, the 'Output:' section displays the results of running the program:

```
Hello, world!  
Scala language: version 2.13.8
```

The screenshot shows a Scala IDE window titled 'HelloWorld.scala' with a file icon '3zkj8ft37' and a 'NEW' button. The code editor contains the following Scala code:

```
1 object HelloWorld {  
2   def main(args: Array[String]): Unit = {  
3     println("Hello, world!")  
4     println("Scala language: "+util.Properties.versionString)  
5   }  
6 }  
7  
8  
9 object Hello extends App {  
10   println("Hello, world")  
11   println("Scala language: "+util.Properties.versionString)  
12 }  
13
```

On the right side, there is a 'STDIN' section with the text 'Input for the program (Optional)'. Below it, the 'Output:' section displays the results of running the program:

```
Hello, world!  
Scala language: version 2.13.8
```
